EG 2023/2006

BEK nr 681 af 25/05/2020

Regulation (EU) 2024/3190

Food contact Materials (FCM) in silicone rubber

Silicone sheeting and silicone profiles (solid) in the following hardness's 30, 40, 50, 60, 70 Shore A are suited for repeated contact with all foodstuffs and are thus in accordance with EU regulation EG 1935/2004.

Materials are manufactured according to good manufacturing process and are thus in accordance with EG regulation 2023/2006.

All the ingredients used in the manufacturing of the above products in transparent, blue, red (iron oxide), white and black are all suitable acc. to FDA 21 CFR 177.2600.

AAG sell materials in accordance with FDA guidelines in 21 CFR 177.2600 (d) through (h). As stated, it is recommended that the material is always thoroughly cleaned before use or in contact with food. We advise to use Sodium hypochlorite diluted solution with a clean cloth.

Materials have also been tested and found to comply with the requirements of BFR XV.

All Silicone elastomer articles covered by this DoCare free of bisphenol A, any of its salts, any other bisphenols or any bisphenol derivatives. These articles comply with Regulation (EU) 2024/3190 on the use of bisphenol A (BPA) and other bisphenols and bisphenol derivatives.

Moreover, please consult the actual datasheets.
